

NEW JERSEY, HAVE YOU HAD ENOUGH YET?

New Jersey is currently rated dead last by the Tax Foundation. New Jersey's tax structure is the main cause of our economic tailspin. We need to start unloading our state obligations to allow the better flow of revenue to our middle-class workers and our communities. If we were able to operate with lower taxes in the past, there is no reason why we cannot operate with lower taxes now or in the future.

Ever since the start of New Jersey's state government, government has been known to do one thing... grow. The size of government is a major issue due to the fact that the larger government grows, the more liberty is lost. We need to take a hard look into government departments and government projects to see where we can consolidate, cut, and reallocate responsibility back to the towns and cities where responsibility and action should be.

New Jersey Governor '09 **CULLEN** ***People Not Politics***

There has been a tremendous public outcry for a stop to corruption, over-taxation, and government waste. We believe that Jason Cullen and Gloria Leustek are the ones who will put a stop to these issues. Jason Cullen is running for New Jersey Governor and, together with Gloria Leustek, plans to bring an administration of action rather than status quo.

New Jersey, it is time to step up to the plate and make the changes that our elected officials either refuse or are afraid to make. We are running because we have **Had Enough** of the two-party machine that legislates away our freedom whenever they have a session. We ask for your support.

We cannot afford to keep expanding government with politicians and policies that do not serve the people. If lower taxes, competitive education, more liberty, and stopping political corruption and waste are only some of the issues that concern you, join the campaign or donate today!
